SUMMARY

Fullstack developer (MERN · NestJS · .NET) with three production SaaS applications integrating LLM-based AI features. Comfortable across the full delivery cycle — database schema design, secure API architecture, responsive React UIs, and cloud deployment. Seeking a junior/mid role at a product-focused company to contribute real business impact from day one.

EXPERIENCE

SoftNET Yönetim Bilgi Sistemleri

July – August 2024

Back-End Developer Intern

- › Built CRUD modules for core business entities (products, orders, users) using ASP.NET MVC and Entity Framework, reducing manual data-entry time for internal operations.
- › Designed relational schemas in MS SQL Server; wrote stored procedures and identified slow queries — improving data access patterns during the internship period.
- › Participated in code reviews with senior developers, gaining hands-on exposure to enterprise MVC architecture and Git-based version control workflows.

PROJECTS

Fintrack | AI-Powered Financial Management & Invoicing Platform

● LIVE

fintrack-app-six-sand.vercel.app

- › Production SaaS platform for invoice creation, expense tracking, and real-time cash flow analytics.
- › AI receipt scanning via Groq (Llama 3.3) + Cloudinary — fully automated expense extraction, zero manual entry.
- › Reduced cold-start latency 3–4 s with a combined /dashboard/all endpoint and DB warmup pattern.
- › Secured with HTTP-Only cookies, JWT refresh token rotation, and SameSite CSRF protection.
- › Stack: Next.js 14 · NestJS · TypeScript · PostgreSQL (Neon) · Prisma · React Query · Tailwind CSS · Groq (Llama 3.3)

ReserveAI | AI-Powered SaaS Appointment Automation

● LIVE

reserveai-cckb.onrender.com

- › Natural-language booking: Groq (Llama 3.3) classifies intent and routes appointments automatically.
- › Cut manual scheduling by ~80% through asynchronous n8n workflows on Railway.
- › XSS/CSRF hardening with HTTP-Only cookies and SameSite config across a cross-origin MERN deployment.
- › Stack: Node.js · React · TypeScript · MongoDB · Groq (Llama 3.3) · n8n · Railway · Luxon

NexPos | Fullstack POS & Inventory Management System

● LIVE

nexpos-app.vercel.app

- › Complete POS system: real-time stock tracking, dynamic invoice generation, category-based product management.
- › Responsive dark-mode UI with minimal re-renders via Redux Toolkit state management.
- › Stack: MongoDB · Express.js · React · Node.js · Redux Toolkit · Tailwind CSS
